A transferable license allows a school to retain a resource in the case of educator turnover. This license is available at a higher price than the non-transferable license and is only offered to schools. For example, if 4 transferable licenses are purchased, and one teacher leaves the school or retires, the new hire will not require an additional license to use the curriculum. This is a more cost-effective option; it is essentially a site license that allows x amount of teachers to use the materials each year (amount of licenses purchased for school).

Multiple license costs

2-5 licenses are offered at a 10% discount off the total.

6-10 licenses are offered at 15% off the total.
